Contents Volume 71

Contents

Advanced obfuscation techniques for Java bytecode
J.-T. Chan and W. Yang 1

Formally analyzing software architectural specifications using SAM
X. He, H. Yu, T. Shi, J. Ding and Y. Deng 11

Systems analyst activities and skills in the new millennium
M.M. Misic and D.K. Graf 31

Anomaly-free component adaptation with class overriding
A. Radenski 37

Design and implementation of the just-in-time retrieving policy for schedule-based distributed multimedia presentations
C.-C. Yang and Y.-Z. Yang 49

Image retrieval system based on color-complexity and color-spatial features
Y.-K. Chan and C.-Y. Chen 65

Improving workload balance and code optimization on processor-in-memory systems
S.-L. Chu, T.-C. Huang and L.-C. Lee 71

Case study: an infrastructure for C/ATLAS environments with object-oriented design and XML representation
C.-W. Chen and J.K. Lee 83

Analysing failure behaviours in component interaction
R. de Lemos 97

Dual link fault diagnosis agreement
S.C. Wang and K.Q. Yan 117

NT-SwiFT: software implemented fault tolerance on Windows NT
D. Liang, P. Emerald Chung, Y. Huang, C. Kintala, W.-J. Lee, T.K. Tsai and C.-Y. Wang 127

Embedding role-based access control model in object-oriented systems to protect privacy
S.-C. Chou 143

HYPPOCRATES: a new proactive password checker
C. Blundo, P. D'Arco, A. De Santis and C. Galdi 163

A component based methodology for Web application development
S.C. Lee and A.I. Shirani 177

DIPS: an efficient pointer swizzling strategy for incremental uncaching environments
J.-K. Min and C.-W. Chung 189

Computer systems
H.D. Karatza 199

doi:10.1016/S0164-1212(04)00023-8

Designing embedded systems using patterns: A case study
M.J. Pont and M.P. Banner 201

Agent-based distance vector routing: a resource efficient and scalable approach to routing in large communication networks
K.A. Amin and A.R. Mikler 215

Dynamic adaptation of application aspects
F. Ortin and J.M. Cueva 229

Genetic-algorithm-based real-time task scheduling with multiple goals
J. Oh and C. Wu 245

Analysis of true fully adaptive routing with software-based deadlock recovery
A. Khonsari, H. Sarbazi-Azad and M. Ould-Khaoua 259

Adaptable architecture generation for embedded systems
L. Chung and N. Subramanian 271
